

Project Fact Sheet

What is a Unified Plan?

The DeKalb County 2050 Unified Plan will combine two of the County's long range plans into one: a **Comprehensive Transportation Plan** that identifies priority transportation projects and policy recommendations and a **Comprehensive Land Use Plan** that establishes the framework for future growth and development. Transportation and land use investments have a direct impact on one another, so the combined plan will create a more consistent, unified strategy. The combined plan will address arts and culture, housing, health and wellness, public safety, sustainability, retail, and annexation.

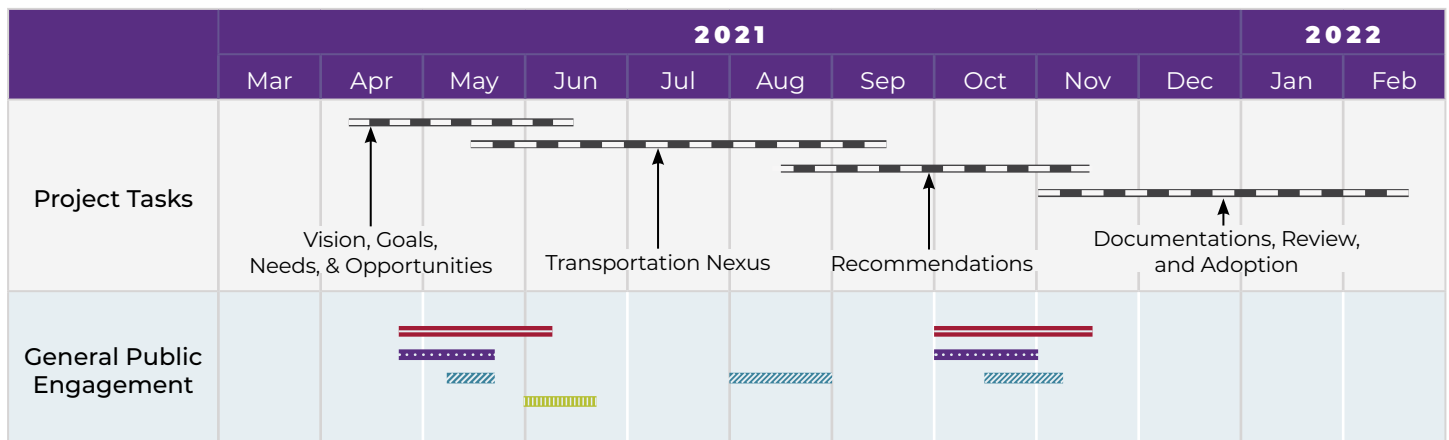

Why is DeKalb creating a Unified Plan?

The combined transportation and land use planning effort will enable the County to develop its strategies and investments in a more coordinated manner. The recommendations of this planning process will help DeKalb leadership determine which transportation projects to pursue for both local funding opportunities and state and federal dollars. The Plan will also include recommendations within unincorporated DeKalb activity centers for the types of growth and development that may occur based on new market realities and trends.

Why 2050?

2050 seems like a long way off, but an integrated short-, mid-, and long-term strategy for land use and transportation ensures that the incremental decisions being made today are forward thinking and made with the County's long-term vision and direction in mind.

How can I get involved?

We want your input! For this process and the County's decision-making framework to be successful, it is critical that we hear from every part of DeKalb County's diverse community. The planning effort will provide a variety of ways for you to stay involved both digitally and in-person. We look forward to hearing from you!
